	D1: DE 198 43 584 A (ZAHNRADFABRIK FRIEDRICHSHAFEN) 30 March 2000 (2000-03-30)		
2	Document D1 is considered the closest prior art and discloses the features of the preamble of claim 1, from which the subject matter of independent claim 1 differs in that: the elements for carrying out the switching procedure are made of a high-strength material and the elements of the selector device and the locking device are made of a low-strength material.		
2.1	The subject matter of claim 1 is thus novel (PCT Article 33(2)). The current invention can therefore be considered to address the problem of developing a switching device which is easy to manufacture and produces little noise.
